

REMARKS

Claims 1-20 are all the claims pending in the application.

I. Claim Rejections - 35 U.S.C. § 112

The Examiner has rejected claims 13 and 14 under 35 U.S.C. § 112, second paragraph, as being indefinite. Specifically, the Examiner contends that claims 13 and 14 should depend on claims 2 and 6, respectively, to provide proper antecedent basis for the phrase “the low frequency removing process.”

Applicant submits that the modifications to the claims obviate the rejection.

II. Allowable Subject Matter

Applicant thanks the Examiner for indicating that claims 1-12 and 15-20 are allowed and that claims 13 and 14 would be allowable if amended to overcome the §112, second paragraph, rejection.

Applicant submits that, with the modifications to claims 13 and 14, this application is in condition for allowance.

In the reason for allowance, the Examiner paraphrases the claim language and Applicant’s arguments presented in the filing of October 12, 2005.

Applicant submits that the claims are patentable based on their own language and not based on any paraphrasing or addition of language that may have been made by the Examiner.

III. Conclusion

In view of the above, reconsideration and allowance of this application are now believed to be in order, and such actions are hereby solicited. If any points remain in issue which the
